P R E F A C E

As a consequence of Partition, the statistics published in future will relate only to the Indian Provinces and States. It is, however, desirable in order to maintain a link with the past to separate the statistics of undivided India for the last few years and to compile the figures separately for the successor administrations. An attempt has been made in this publication to present figures of classification of area and estimates of area and production for the principal crops for the period beginning with the pre-war triennial average and ending with the year 1945-46 separately for Indian Provinces, Indian States, Pakistan Provinces and Pakistan States.

2. The detailed work involved in the preparation of this publication has been done by the Crops I Branch of the Directorate of Economics & Statistics under the supervision of Shri N.N. Agrawala and its subsequent revision under that of Shri Gian Chand.

New Delhi: J.S. RAJ
Economic and Statistical Adviser,
Ministry of Agriculture.
30th June, 1949.

EXPLANATORY NOTE

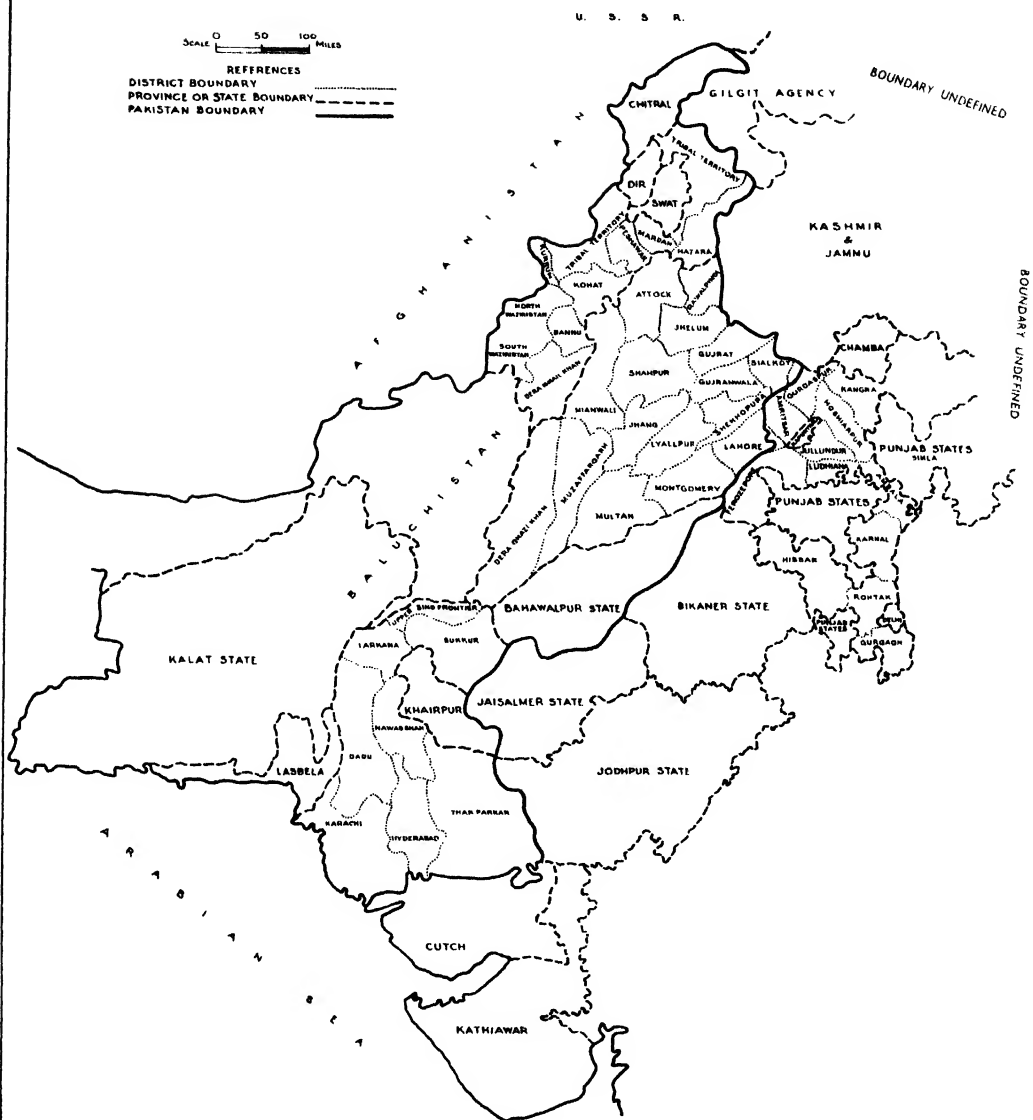

The figures of area and production of principal crops presented in this publication relate to the reporting areas of Indian Union and Pakistan and represent the revised estimates released by the Director of Commercial Intelligence and Statistics Calcutta, who was responsible for the compilation of agricultural statistics in the past. In the case of five provinces, namely East Punjab, West Punjab, East Bengal, West Bengal and Assam, the figures of the former undivided provinces of the Punjab, Bengal and Assam had to be recast so as to correspond to the frontiers of the newly demarcated provinces. The figures for partitioned provinces of East Punjab, West Bengal and Assam have been received from the respective Provincial Governments except in the following cases where the figures have been estimated on the basis described below:-

- (1) The figures of classification of area prior to 1943-44 in East and West Punjab represent the total of district-wise figures as given in the Season and Crop Reports for each year. In the case of Gurdaspur and Lahore districts where a part of the territory has gone to Pakistan and a part to the Indian Union, figures for these smaller subdivisions were not available; hence the tehsil of Shakargarh from the Gurdaspur district which has gone to Pakistan and the portion of the tehsil of Kasur from the Lahore district which has been allotted to the Indian Union are assumed to balance against each other. The figures for the whole of Gurdaspur district have accordingly been added to the figures of the East Punjab and those for Lahore district added to the figures for West Punjab.

(ii) In the case of Assam figures of classification of area and of the area and production of tobacco have been arrived at by deducting from the figures for undivided Assam 85 per cent of the figures relating to the district of Sylhet as given in the Season and Crop Reports, since the geographical area of this district is shared by the Indian Union and Pakistan in the ratio of 3 : 17.

2. The difference between the figures for the pre-partitioned Punjab and East Punjab have been taken to represent the figures for West Punjab. Figures for East Bengal have been worked out by deducting the figures for West Bengal and Assam from the total for the undivided Province of Bengal and Assam.
